Company: **Grupo NUNSYS S.A.**

DESCRIPTION OF THE CHALLENGE

CHALLENGE

3 - Generator of a knowledge-based expert system

SUMMARY

We are looking for a solution company for...

- Developing a knowledge base generator in an expert system to be driven by the Drools market rules engine.

HOW COULD WE

Get a solution...

- Based on artificial intelligence to generate a cognitive system,
- that works in collaboration with humans in decision making.

The project should consist of creating an intuitive knowledge base generator for non-technologists, which allows knowledge to be digitized into actionable rule structures for decision making.

REQUIREMENTS

The company must...

- Know the Common Kads methodology for the extraction of expert knowledge and the generation of knowledge bases.
- Know Drools and similar rules engines.
- Have knowledge of natural language processing for the extraction of domain entities based on documents and/or multimedia content of different structures (audio, video, reels...).
- Have developed hybrid artificial intelligence projects combining large database processing and expert knowledge processing.
